

Finndraft 2019/2020

Purpose and meaning

The Swedish Finn sailors want to share the most fun we know, Finn sailing.

We think that the more we become, the more fun it becomes and our idea is that Finn sailing is like a positive drug, where you have once tried it is difficult to stop.

Therefore, we now want to attract our already active sailors to lend their boats to young as old, pro or amateur, all in order to attract more sailors to our class.

Who can join?

All active members of Swedish Finn Association can compete.

How does it happen?

You lend your or someone else's Finn to someone who wants to try.

You document the sample with a picture when the person is in the Finn, which is on the water.

You submit the picture to par.friberg@parkman.nu to register and score points.

How does the scoring calculate?

- A proven test sailing gives 1 point
- A proven test sailing in a race with start and finish gives 5 points
- A documented test sailing in which the person is starting in a race included in the Swedish Cup gives 10 points
- (The Punch Cup is not included in the competition)

When do we start and when do we stop?

The draft starts when the presentation is presented on the Finn associations website and runs until the end of the Swedish championships 2020.

What are you winning?

All Finn sailors will win because the competition probably leads us to become more people who sail Finn.

But since Swedish Finn Association really wants to make sure to get more sailors to the class, prizes are shared in money or gift cards, where the board is unanimous judge.

- The first prize is a total of SEK 5,000 that can be converted into a gift card from any of Swedish Finn Association's contacts.
- The second prize is a total of 2,500 kronor that can be converted into a gift card from any of Swedish Finn Association's contacts.
- The third prize is a total of 1,250 kronor that can be converted into a gift card from any of Swedish Finn Association's contacts.
